Office Use: Date _____ Weight _____

Anesthetic/ Procedure Consent Form

Client Name _____
 Pet Name _____
 Contact Number(s) _____

At our hospital we strive for excellence when caring for your pet. When anesthetic procedures are required, we recommend minimizing the risk by using blood tests and intravenous fluids. We also recognize that there are times and situations when you may prefer less costly options. We respect this and ask that you help us meet your expectations by filling out the following.

An I.V. catheter will be placed to provide access for administration of medication if indicated during anesthesia.

Continuous Intravenous (I.V.) Fluids

Continuous I.V. fluids can be added during anesthesia help to maintain your pet's blood pressure. This is important for providing adequate blood flow to their vital organs such as the liver and kidneys. **Because of the significant benefits of I.V. fluids, we recommend them for all anesthetic procedures.**

- | | | |
|-----------------|---|--------------------------|
| Option 1 | Continuous I.V.....\$100.00 | <input type="checkbox"/> |
| Option 2 | No pre-placed I.V. catheter or fluids.....Basic Price | <input type="checkbox"/> |

Pre-Anesthetic Blood work

Blood tests are used to screen for medical problems that may not be apparent on physical examination and could increase anesthetic risk. More involved tests provide more information but incur greater costs. We encourage some level of blood screening be done for all animals undergoing an anesthetic.

- | | | |
|-----------------|--|--------------------------|
| Option 1 | Extensive Blood Panel.....\$182.50 | <input type="checkbox"/> |
| Option 2 | Regular Blood Panel.....\$155.00 | <input type="checkbox"/> |
| Option 3 | Decline pre-anesthetic blood tests.....Basic Price | <input type="checkbox"/> |

Additional Procedures/ Observations

Often multiple procedures can be combined into one anesthetic. This saves on multiple anesthetics for the pet and additional costs for you. Please let us know if there are any other procedures we can help you with today.

Deciduous Teeth/ tooth.....	\$42.00	<input type="checkbox"/>
Hind Dewclaws/ pair.....		<input type="checkbox"/>
Umbilical Hernia.....	\$97.00	<input type="checkbox"/>
Microchip.....	\$36.00	<input type="checkbox"/>
Cryptorchid.....	\$97.00-147.00	<input type="checkbox"/>
In heat (Dog)	\$83.00	<input type="checkbox"/>
Ear exam/treatment.....		<input type="checkbox"/>
No additional procedures necessary.....		<input type="checkbox"/>
Decline any additional procedures.....		<input type="checkbox"/>

Elizabethan (Cone) Collar

Some procedures require your pet to wear a cone collar post procedure.
This may be at the discretion of the attending veterinarian.

Please send my pet home with a cone collar post procedure for an additional cost of \$6.03-\$16.23

Decline sending home a cone collar

At our hospital we realize the importance of pain management. We have done our best to ensure that your pet has been comfortable by providing them with proper pain medication while under our care. We may recommend that additional pain medication be sent home with your pet at the time of discharge.

I understand that reasonable care and precautions will be taken with regard to restraint, anesthesia, and surgery performed on my pet. I also understand that any procedures requiring anesthesia are associated with certain amount of risk. I accept responsibility for these risks and authorize the hospital to perform the procedure(s) or surgery(s) on my pet while under anesthesia.
