Annual Check-Up

Twice yearly, we perform a complete check-up. During these appointments, our doctors and technicians will collect a full history and perform a series of examinations and assessments to prevent disease.

Vaccinations

Senior cats continue to need regular vaccines to stay healthy. Our Senior Care Feline Programs include these vaccinations:

- FVRCP Combo (rhinotracheitis, calicivirus, and panleukopenia)
- Rabies
- Feline Leukemia

Parasite Screening

A fecal exam detects parasites and other intestinal organisms that can cause disease. We then recommend a parasite (dewormer) for your cat to take regularly.

Preventive Blood Tests

Blood work screens for medical conditions, including diabetes and kidney disease. Early diagnosis and management can improve quality of life. Even if your cat is young and healthy, performing this testing establishes normal values which can be compared overtime. Our tests include a "CBC" (complete blood count), which can help determine whether your cat is dehydrated, anemic or dealing with an infection. The "comprehensive chemistry" monitors internal organ function (liver, kidneys, pancreas) and the "urinalysis" assesses the health of the kidneys and urinary system and detects diabetes. The "Total T4" screens for hyperthyroidism.

Annual Blood Pressure Testing

There are several medical conditions where regular monitoring helps keep your cat healthy and provides much needed information for your veterinarian.

Dental Cleaning

As tartar builds up, abscesses may form along the gum line causing infection. Left unattended, the infection can enter the blood stream leading to serious health problems such as heart, liver, lung, and kidney disease. Dental cleanings include an examination, X-rays, anesthesia, cleaning and polishing to remove plaque from tooth surfaces.

Complimentary Virtual Visit

Meet with a veterinarian via phone or video call from the comfort of your home.

Additional Discounts

Depending on the Program selected, you will receive 5% off parasite medications and prescription drugs. Our Programs also include a \$5 or \$10 off coupon for purchases in our convenient online store – have your cat's food shipped to your home!

Payment & Financing Options

We require payment in full of the full cost of the Program upfront. Services are used over the 12 months of the Program. We accept Visa, Mastercard, debit, cash, or e-transfer. We have partnered with Paybright, allowing the cost to be spread out into regular payments for easier budgeting.

Additional Products and Services

Our regular fees are billed for all products and services not included in the Program. Emergencies, treatment for sickness, surgery, additional laboratory testing, and diagnostic imaging are examples of items not included in the Program. Pet insurance can be purchased to help cover the cost of unexpected sickness and emergencies.
