

Please Note: We are no longer accepting needles for disposal. Please refer below for disposal instructions

All used needles should be safely stored in an approved biohazard container until the time of disposal. Do not put used needles directly in the garbage, as this poses a safety risk to anyone who comes into contact with your garbage.

Disposal containers are available at most pharmacies, and are usually under \$10.00.

Most pharmacies will accept properly packaged used needles, but participation in this program is voluntary. Please call your local pharmacy to confirm they will take your container.

Used needles can also be dropped off at your local public health unit.

Please phone to confirm acceptance of used needles
