# Feeding and Administration:

Pro Plan Veterinary Diets EN Gastroenteric Dry Canine Formula is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb. or more as an adult). Animal feeding tests using AAFCO procedures substantiate that Pro Plan Veterinary Diets EN Gastroenteric Canned Canine Formula provides complete and balanced nutrition for growth of puppies and maintenance of adult dogs, including growth of large sized dogs (70 lb or 31.8 kg or more as an adult).

The following feeding program is recommended as a guideline only, with discretionary clinical adjustments for proper weight maintenance.

## Gastrointestinal Health:

Highly digestible to promote optimal nutrient absorption

Contains medium-chain triglycerides (7.5 – 12.1% of fat), a source of fat which is easily digested and absorbed to provide readily available energy

Colostrum helps stabilize intestinal microflora, reducing the risk of stress-related diarrhea, and primes local and systemic immune systems (dry)

Contains a select prebiotic fiber to support GI microbiome balance and digestive health (dry)

## General Health:

- High in antioxidant vitamins A and E to support a healthy immune system
- Great taste to help ensure adequate nutrient intake

† Based on digestion testing conducted at the Purina PetCare Technology Centers

- 1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.
- 2 Kilocalories of metabolizable energy (ME)
- 3 This daily amount should be divided into several small meals throughout the day.
- 4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.
