<b>Selenium (Se) (Min)</b>	0.31 mg/kg

GUARANTEED ANALYSIS	
Vitamin A (Min)	15,000 IU/kg
Vitamin E (Min)	500 IU/kg
Pyridoxine (Min)	3.0 mg/kg
Folic Acid (Min)	0.6 mg/kg
Ascorbic Acid (Vitamin C)* (Min)	90 mg/kg

### 1. High in Medium Chain Triglycerides (MCTs)

- MCTs are a unique type of fat that can bypass normal digestion and provide an alternative energy source for the brain, especially helpful in aging dogs with reduced glucose metabolism.
- Studies show that diets high in MCTs can improve memory, attention, and learning in senior dogs.

### 2. Shown to Help Manage Idiopathic Epilepsy

- Clinical trials (in collaboration with neurologists) found that dogs with epilepsy who were fed NeuroCare had fewer seizures when used alongside medication.
- It's one of the only diets with peer-reviewed data showing benefit in seizure management.

### 3. Rich in Omega-3 Fatty Acids (EPA & DHA)

- These support anti-inflammatory processes in the brain and help maintain neuronal function.
- Beneficial for both cognitive function and general brain health.

### 4. Antioxidants and Arginine

- High antioxidant levels help combat oxidative stress, which is associated with cognitive decline.
- Arginine promotes healthy blood flow to the brain.

### 5. Complete and Balanced

- Even though it's therapeutic, it's still fully nutritionally balanced, meaning it can be used as a long-term maintenance diet under vet supervision.
