

Hills J/d Mobility Diet Guide

Improving your dog's mobility is as easy as feeding the right nutrition. Being proactive about mobility issues early can avoid the need for more aggressive treatments. Hill's® Prescription Diet® j/d® helps your dog walk, run and jump more easily in just 21 days. Hill's® Prescription Diet® j/d® Canine is a complete and balanced food that provides all the nutrition your dog needs.

How it works:

- Therapeutic levels of omega-3 fatty acids
- Enriched with glucosamine & chondroitin sulfate
- Controlled calories & added L-carnitine
- Clinically proven antioxidants

How it helps:

- Helps preserve joint cartilage
- Helps maintain a healthy weight and avoid extra stress on joints
- Supports a healthy immune system

100 (45)

5 1/3 (530)

120 (54)

6 1/4 (620)

Animal feeding tests using AAFCO procedures substantiate that Hill's Prescription Diet j/d Chicken Flavor Dog Food provides complete and balanced nutrition for maintenance of adult dogs.

Adjust feeding amounts as necessary to maintain optimal weight. If you are unsure, ask your veterinarian.

For best results & safety practices:

- Use within 60 days after opening.
- Gradually transition to your pet's new food over a 7 day period.
- Exclusively feed the recommended Prescription Diet dry food, canned food & treats.
- Keep fresh water available at all times.
- Have your veterinarian monitor your pet's condition.
- To prevent suffocation, keep the packaging out of the reach of pets and children.
