

How to adjust feeding amounts to maintain **optimal weight**.

- Provide specific feeding instructions for your patient.
- Daily Feeding Recommendations are only a guide and a place to start.
- Grams are the most accurate form of measurement; cups are estimated from grams.
- Monitoring your patient's condition will assure the nutritional recommendation provides the best results.
- Gradually transition to this new food for 7 days or more.
- Reinforce with clients to feed Prescription Diet dry food, canned food, & treats exclusively.

## ONC Care Chicken & Vegetable Stew Cat Food

Hill's Prescription Diet **ONC Care** Wet Cat Food is specially formulated by nutritionists & veterinarians to help nourish and support cats living with cancer. Prescription Diet **ONC Care** Wet Cat Food helps maintain weight & lean muscle with flavorful fats & highly digestible protein. In fact, Prescription Diet **ONC Care** Wet Cat Food has the highest caloric density within the Prescription Diet wet portfolio.\* In addition, Prescription Diet **ONC Care** Wet Cat Food helps manage inflammation with added essential omega-3 & 6 fatty acids as well as helps maintain consistent stool quality with **ActivBiome+**, a proprietary blend of prebiotics shown to rapidly activate the gut microbiome to support digestive health and well-being.

This wet food is made with chicken & vegetables and has an irresistible taste that cats love.

\*as measured by kcal/cup, intermittent products excluded

These characteristics make Prescription Diet **ONC Care**, veterinary exclusive wet cat food, a useful nutritional aid for cats with cancer

KEY FEATURES		KEY BENEFITS
Exceptional Taste	High	Clinically tested to promote food intake.
Energy Density	High	To meet requirements in smaller meals and help during times of decreased appetite.
Protein Digestibility	High	Easy assimilation of essential amino acids.
Essential Amino Acids	Increased	More than 180% of AAFCO minimum to help the cat's natural ability to maintain muscle mass daily.
L-Carnitine	Increased	Helps improve utilization of fat to avoid muscle breakdown for energy.
Omega-3 Fatty Acids	High	Help manage inflammation.
<b>ActivBiome+</b> proprietary blend of prebiotic fibers	Added	Helps maintain consistent stool quality.

### Not Recommended For:
